RAJESH RANJAN

DevOps Engineer | Azure Cloud | CI/CD | DevSecOps

rajeshranjan12309@gmail.com | +91 98910 03479 | Noida | India

PROFESSIONAL SUMMARY

Results-driven Azure DevOps Engineer with 7+ years of experience designing and managing cloud infrastructure, CI/CD pipelines, and Infrastructure as Code (IaC) solutions. Deep expertise in Azure DevOps, GitHub Actions, Docker, Kubernetes (AKS), and cloud security integration. Proven track record of automating deployments, reducing deployment time, optimizing infrastructure costs, and driving DevSecOps culture by integrating security tools (SonarQube, Checkmarx, tfsec) into CI/CD pipelines for shift-left security. Experienced in building robust monitoring and observability solutions using Grafana, Prometheus, Azure Monitor, and Log Analytics to ensure high availability and system reliability.

CORE TECHNICAL SKILLS

Cloud Platforms: Microsoft Azure (Primary), AWS, Oracle Cloud
DevOps & CI/CD: Azure DevOps (YAML Pipelines), GitHub Actions
IaC & Containers: Terraform, Docker, Kubernetes (AKS, EKS)
Security (DevSecOps): SonarQube, Checkmarx, tfsec, Azure Key Vault
Monitoring & Observability: Prometheus, Grafana, Azure Monitor, Log Analytics
Scripting & OS: Bash, Python, Linux (RHEL), VMware

WORK EXPERIENCE

PRISM (Formerly OYO)

Sep 2023 – Present

DevOps Engineer

- Designed and managed Azure Classic and YAML-based CI/CD pipelines enabling fully automated, zero-touch deployments across multiple environments.
- Modernized legacy infrastructure by migrating to Terraform (IaC), achieving consistent, reusable, and version-controlled cloud environments across Azure subscriptions.
- Implemented DevSecOps practices by integrating SonarQube, Checkmarx, and tfsec into pipelines — enforcing code quality gates, compliance checks, and vulnerability detection at every stage.
- Deployed and orchestrated Docker containers on AKS clusters with auto-scaling and rolling updates, significantly improving application scalability and reducing downtime.
- Collaborated with cross-functional development and QA teams to troubleshoot, optimize, and automate complex DevOps workflows, reducing manual effort by streamlining release processes.

DishTV India Ltd

Jul 2022 – Sep 2023

Cloud Engineer

- Developed and optimized CI/CD pipelines using Azure DevOps and GitHub Actions, reducing deployment lead time and increasing release frequency.
- Containerized applications using Docker and deployed them on Kubernetes (AKS and EKS) with auto-scaling, load balancing, and rolling updates to achieve zero-downtime releases.
- Configured comprehensive monitoring solutions using Prometheus, Grafana, and Azure Monitor, enabling proactive system health tracking, alerting, and performance tuning.
- Implemented secrets management using Azure Key Vault and HashiCorp Vault, ensuring secure handling of credentials and application secrets across all environments.
- Strengthened cloud security and compliance by embedding DevSecOps practices into CI/CD pipelines, integrating tools for vulnerability scanning, policy enforcement, and audit logging.

SBI General Insurance
Nov 2018 – Jul 2022

Linux System Administrator

- Installed, configured, and maintained RHEL servers (physical and VMware virtual machines), performed Leapp upgrades from RHEL 7 to RHEL 8.
- Managed cron jobs, Linux processes, and performance monitoring using tools such as ps, top, and vmstat to ensure optimal server health.
- Administered user accounts, groups, sudo privileges, and file permission management across production Linux environments.
- Managed Logical Volume Manager (LVM) partitions, performed backup administration using tar, and maintained production server error log documentation.
- Handled Incident, Problem, and Change management processes; monitored alerts and ensured timely resolution of system issues.

Vodafone Idea Limited
Feb 2016 – Nov 2018

Data Analyst

- Handled operational and business data analysis using Advanced Excel and SQL, creating MIS reports, dashboards, and performance trackers (Pivot Tables, Conditional Formatting, VLOOKUP).
- Automated repetitive reporting tasks using Excel VBA macros, significantly improving team efficiency and reporting accuracy.
- Wrote complex SQL queries (joins, subqueries, aggregations) to extract and analyze data from MySQL databases; performed data cleaning, validation, reconciliation, and trend analysis.
- Prepared daily, weekly, and monthly performance reports for senior management and internal stakeholders.

EDUCATION

Bachelor of Arts (BA) *2012 – 2015*

Tilka Manjhi Bhagalpur University
